RESPONSES TO INTERROGATORIES

A.C. ROBISON

Re: MUR 2314

1. I am not able to explain the described discrepancy. I was not closely involved with the accounting aspects of the campaign. While I was generally aware that the Direct-to Program existed and that the campaign was benefiting significantly from the NRSC, I was not specifically aware of the amounts or details of those contributions.

2a. I was generally aware of NRSC programs by which it recommended to donors that they make contributions directly to campaigns of their choice rather than to the NRSC however, I have no recollection or ever actually seeing the Direct-to Program Agreement signed and dated December 13, 1985 during the course of the campaign nor am I aware of the meaning of the phrases described in Question 2a.

2b,2c,2d,2e,2f. I have no knowledge, nor did I have reason to have any knowledge as to NRSC solicitations, methods of contribution distribution, nor specific operation of the various programs of the NRSC. My task was to raise money within Nevada, run the political campaign operation, and make sure the campaign didn't run a deficit based on financial information provided me by the campaign finance department.

Request for Documents. I personally maintained very few files during the campaign. What I did maintain contained documents relating to the political and not the financial aspects of the campaign. The campaign finance department maintained all finance related information and files. My political files were turned over to the campaign in November, 1986 and were presumably stored along with other files of historical interest.
